

FAIRBANKS
 MUSEUM
& planetarium
STEM
Lab

Grand Opening
McGuire Building
73 Prospect Street, St. Johnsbury
Thursday, January 17th
5-7pm

Thank you for your support! We look forward to seeing you on January 17th. We are now able to introduce real science equipment and methods to students in the new Fairbanks Museum STEM Lab, created in partnership with New Hampshire Academy of Science. A fabulous combination of cutting-edge practices and curiosity is launched! With support from the Argosy Foundation, Jack & Dorothy Byrne Foundation, and individual donors like you, this extraordinary learning facility is piloting a program to nurture innovative science research for students in the Northeast Kingdom.

This opening is hosted by current Lab students and offers a tour of the state-of-the-art equipment, an introduction to the model organism *C. elegans*, and hands-on use and demonstrations of lab equipment.

Food, drink, and fun will be served throughout the evening. Fairbanks Museum STEM Lab is located in the McGuire Building. On street parking is available. There is additional parking on Thaddeus Lane.
